NOTABLE PROJECTS

Halal Finder — *"Find all the halal restaurants in your city"* • *Completed: 1 week*

- Utilized MERN stack to provide a visual and functional mobile first web application that is scalable and bug free.

Closr Agile Project — *"A CRM software for avid professionals"* • *Completed: 2 Weeks*

- An Agile MERN Full-Stack project that accrued over 120 pull request. I was the designer and provided graphical mock-ups and standardized design patterns project wide. I also engaged in Front-End tasks until completion of project.

EXPERIENCE

Parsity — *"A Software Development school"*

- Accomplished over 750+ hrs of learning and creating Full Stack apps in a full-time immersive certificate program
- Learned underlying foundation behind full-stack frameworks(MVC data flow, React/Redux, Express.js)
- Utilized source control and collaborated daily with classmates on lessons and Agile projects
- Built over 20 web projects, including a week long solo Full Stack application

Ampi-Volt Designs — *"An LED lighting and graphic design company"*

- Managed and operated a B2B design company that specialized in LED lighting and design
- Set up incentive energy programs for acquired clients that contracted local energy companies to pay up to 80% of job costs.
- Utilized Adobe Suite Applications to create digital and print designs

A&K Grill — *"A c-store with an integrated restaurant"*

- Oversaw sales, strategic planning, design, marketing and vision for a self-owned and financed convenience store/restaurant
- Directed all daily business operations and formatted patterns for employees to follow. Patterns would include; customer service, professionalism and sales driving
- Added and tested new products and strategies. The results of which saw increases in sales and profit margins.
